

WEEK 4: Create a program that displays days of the week using an enum to capture the days. Use a super and a sub class in your program.

```
enum Day {
    MONDAY,
    TUESDAY,
    WEDNESDAY,
    THURSDAY,
    FRIDAY,
    SATURDAY,
    SUNDAY
}

class Week {
    void displayMessage() {
        System.out.println("Days of the Week:");
    }
}

class DayDisplay extends Week {

    void displayDays() {
        for (Day day : Day.values()) {
            System.out.println(day);
        }
    }
}

public class DaysOfWeek {
    public static void main(String[] args) {

        DayDisplay display = new DayDisplay();

        display.displayMessage();
        display.displayDays();
    }
}
```
